1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-78, drawn to a handle, classified in class 16, subclass 430.
  - II. Claim 79, drawn to a method of designing a handle by measuring and mapping, classified in class 33, subclass 1G.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make other materially different product such as footwear, gloves or body supports.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. If applicant elects invention I above, the following will be applicable:

This application contains claims directed to the following patentably distinct species of the claimed invention: 1. figures 7-10B, 2. figures 10C-10D, 3. figure 10E, 4. figure F, 5. figure 10G, 6. figure 10H, 7. figure 10I, 8. figure J, 9. figure 10 K, 10. figures 10L1-10L2, 11. figure 10M, 12. figure 11, 13. figure 12A, 14. figure 12B, 15. figure 12C, 16. figure 12D, 17. figure 12E, 18. figure 12F, 19. figure 12G, 20. figure 12H, 21. figure 12I, 22. figure 12J, 23. figure 12K, 24. figure 12L, 25. figure 12M, 26. figures 12N-12O, 27. figures 12P-12Q, 28. figure 12R, 29. figure 12S1, and 30. figure 12S2.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chuck Mah whose telephone number is (703) 308-0676. The examiner can normally be reached on 5/4-9.
